PETER F. PRIOLA, ARCHITECT, AIA

ANN SCHMUELLING, ARCHITECT, AIA

■ The Music School incorporates a 900 seat Concert Hall, a 200-seat organ/ recital hall and an art gallery. The Organ/Recital Hall is a multi-functional space with seating that is moveable and can be rearranged. Recitals take place upon a stage at one side, while organ performances are viewed from the opposite end. This space also features a viewing balcony, allowing a raised position for the pipe organ, enhancing the quality of the organ's sound. The curvilinear lobby connects all the primary building spaces including the courtyard. This central space is an important design element and symbolic to the Mennonite faith, respecting the founders of Goshen College.
