MUNIN CHOUDREY, ARCHITECT, AIA,

■ The Lake Area Katrina Memorial Park concept is to express the story of the Hurricane Katrina catastrophe in New Orleans while also expressing the city's crucial relationship with its water resources. The park utilizes water as a central unifying and symbolic element. The Katrina story is a dramatic event in the history of the city's long relationship with water, and this concept seeks to remember the impact of that event and the individual lives lost, while also affording reflection upon the importance of the area's natural water resources to the city's way of life and unique cultural identity.
