GEOFFREY HARTNETT, AIA

ROSIE ADAMS | TIM LUPIN

■ Metairie Country Club designed by our predecessor firm, and was built in 1924. It has undergone several renovations since then. Extensive flooding and roof damage occurred from Hurricane Katrina and has since been demolished, redesigned and, now is being reconstructed. The original building is being re-stored to its 1924 grandeur. Mathes Brierre Architects was selected to design the “new” Club, which consists of restoration of the 1924 portion and the and additions around this centerpiece. The pools and tennis courts have been relocated, while the gym was expanded.
