■ In order to further their goal to awaken, enlighten, and transform today's students into tomorrow's business leaders, Loyola University New Orleans has recently completed a state of the art stock trading training room to house 21 students. This modern addition sits prominently affront Miller Hall and offers a highly visible glance into the world of finance and trading with interactive LCD screens, white boards, projector, ticker tape reader board and up to the minute trading news. A curved glass storefront addition, metal paneling sun control devices give this room the high-tech feel while also respecting the architecture of the 1950's design found in Miller Hall.
